Cold Drink Cups

Truly biodegradable plastic - the smart choice for sustainability

Eco-Smart™ allows plastic to biodegrade* through a series of chemical and biological processes when disposed of in a microbe-rich landfill environment.

Managed Landfill = Biodegradation

EcoSmart™ allows microorganisms to break down the plastic, into natural bi-products.

Recycled

EcoSmart™ doesn't change the recycling process.

EcoSmart™ is blended with plastic, then turned into consumer products right here in Australia!

To find out more, visit: www.mpmmarketing.com.au

*Biodegradation rates of Eco-Smart™ treated plastic materials measured according to the ASTM D5511 test method. Actual biodegradation rates will vary in biologically-active landfills according to the type of plastic used, the product configuration, and the solid content, temperature and moisture levels of the landfill.
